📁 PROJECTS

Task Pay, Secure Task Management and Payment System ⌭
- Developed a comprehensive robust task management platform designed to streamline interactions between buyers and sellers. Key functionalities include task assignment by buyers, with each task encompassing a project name, description, and price. Sellers have the capability to accept tasks and initiate payment blocking to secure funds. Upon task completion, sellers can request payment release, subject to buyer approval.
- **Technologies**: Spring Boot , Flutter , MySQL .

FoodiBizz, Seamless Bill Generation and Financial Tracking System ⌭
- Developed a robust application designed to streamline billing processes. **FoodiBizz** enables seamless bill generation, efficient storage of billing particulars, and comprehensive tracking of billing history, ensuring accurate and accessible financial records.
- Technologies: Flutter .

Pulpit Driver, Cab Booking and Management Platform ⌭
- Developed a subscription-based cab booking platform offering convenient cab services for users and a unified platform for various business markets. Pulpit Mobility meets all transportation needs, including local travel, outstation travel, and rental services, ensuring competitive prices and comprehensive service coverage.

Harmony, Therapy Management System
- The Harmony Management System is a comprehensive solution for therapy management. Doctors can view reports, track session details, and monitor patient progress. Executive users can manage scheduling, assign sessions, change doctors, book patients, and handle leave applications, ensuring efficient and streamlined operations.
